xAPI and Temporality

OPEN STANDARDS TO STORE AND ANALYSE TEMPORAL LEARNER DATA

25 April 2016 | lak16time | Danny Liu, Ed Moore, James Hamilton, Yvonne-Noemi Nemes

Conceptions of temporality

PROCESSES AND SEQUENCES

MACQUARIE
University

- Reimann 2009
 - Variable-based: independent acting on dependent
 - Event-based: sequences of ‘events’ over time
- Zhou et al. 2010
 - Student-based: sequential patterns → common learning behaviours
 - Session-based: actions from a single session
 - Object-based: differentiates the objects of actions

¿Porque no los dos?

MULTIDIMENSIONAL TEMPORALITY

MACQUARIE
University

Openness

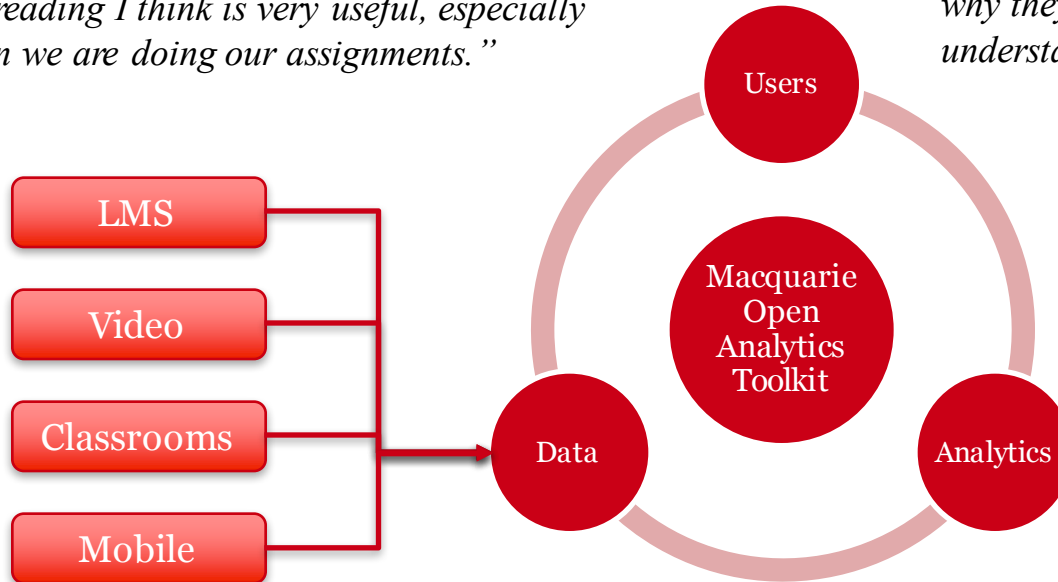

STORING AND ANALYSING TEMPORAL LEARNER DATA

MACQUARIE
University

“I know that what kind of articles other students are reading I think is very useful, especially when we are doing our assignments.”

“...know what the top students were doing, why they were top students... getting an understanding of what they do differently...”

Storing learning experience data

LEVERAGING XAPI

MACQUARIE
University

```

MACQUARIE
University

Understanding learning paths

OVERLAYING DATA – QUIZ PERFORMANCE

MACQUARIE
University

‘Understanding’ learning paths?

SANKEY DIAGRAMS

MACQUARIE
University

- Immediate concerns
 - What is a session?
 - When did these happen?
 - How long did they take?
 - What verbs are plotted?
 - What are meaningful overlays?
 - Is this all behaviourism???

Questions arising

FOR STUDENTS AND TEACHERS

MACQUARIE
University

- Are there interesting and meaningful behaviour patterns?
- Does this reflect study strategies?
- How does this speak to learning design?
- What variables are interesting and meaningful?
- What kind of event/action/temporal granularity?

Questions arising

FOR THE LEARNING ANALYTICS COMMUNITY

MACQUARIE
University

- How can other dimensions be represented meaningfully?
- What levels of context are most important?
- How else can we mine xAPI datastreams?
- How can we collaborate via open standards to co-develop better tools for practitioners?

It takes a village
